Objective: be familiar with where items are on the ambulance
Station: Main Station
Time Started: 18:00
Time Ended: 21:00
Type: Company Training
Instructor: Department Trainer
Hours Paid: 3.00

Description

Officers meeting prior to department meeting. items discussed were getting into the practice of on every call switching to fire ground channel. next item discussed was working on fire ground operations and getting more efficient with that practice. Last item discussed was opinions being published in the local news paper that could affect our members and affect them wanting to continue being active on this department.

Completed unit 12 walk thru.

We took Tower 1, E-1 and R-4 and conducted some driver training as well as pumping water with T-1 and using the CAFS system. The members were very happy with the CAFS demonstration and are looking forward to more trainings on it. The hopes are that this CAFS system when utilized to its full potential could lessen the burden on the towns water system during a structure fire and the results of a quicker fire knock down means less exposure to our members to the hazards of a structure fire.
